

Timestamp	Will you still participate with a mask mandate in place?	Would you participate if vaccination is required?	How about if it is NOT required?	Are you fully vaccinated or would you get vaccinated prior to starting rehearsals?	Any other comments ?
9/2/2021 8:28:55	Honestly, I'm not sure.	Yes	Yes	Yes	I have not found a mask that I can comfortably sing in (even the black one Patrick uses).
Paper	No	Sure	Yes	Yes	
9/1/2021 18:11:15	no	yes	yes	yes	I'm not opposed to masks (I always wear one when it's valued or required), but just because of where I'm at and the practical effects on singing - I would just simply prefer to wait until we can sing without them to participate
9/2/2021 18:56:50	No	Yes	Yes	Yes	I do want to participate, and wearing a mask in everyday life is not an issue for me at all. But singing with a mask is just not an enjoyable experience. Singing properly, with good technique, is a definite challenge while wearing a mask.
Paper	Yes	No	Yes	No	
Paper	Yes	No		No	I am a new member and delighted to have this opportunity to be part of this group. However, I have several family members who suffered severe reactions to the vaccine, and as I have a genetic pre-disposition to similar conditions, I do not feel comfortable getting "the poke." furthermore, this violates my religious convictions as the vaccine uses aborted fetus cell lines. I am willing to abide by all non-invasive health precautions, but due to religious reasons and my own safety concerns, will not be getting this vaccine. It saddens me that stance will most likely mean that I will be kicked out the chorale before my first rehearsal. I can only ask you to consider conditions for exemption.
9/1/2021 11:44:20	Yes	No, because that goes against freedom of choice and against hypa regulations. Because there are many out there who do not get the vaccine due to medical issues or allergies to the vaccine itself. As myself, my doctor has suggested for me to wait as I have allergic reactions to three of the ingredients in the vaccine, therefore I have to wait until one is available that fits my medical needs.	Yes, one those that are vaccinated should not have to worry about those that are not.	N/A	Only please do not make it mandatory, for as I said this is not actually freedom, I understand wanting everyone to be safe, but mandating it would make it forcing them to reveal privacy of ones health. Those that are vaccinated should not have to worry, this is a stress reliever for most. And there are many in this group which are responsible adults, who I think with proper care we can move forward.but please keep choice alive.
Paper	Yes	Yes	?	Yes	It's not for me, it's for the community

9/3/2021 15:40:14	yes	yes	yes, but would prefer it be required	yes, I am fully vaccinated, alon	I think a vaccination requirement by any organization with persuasive leverage will help save lives. I support this, even if it means we lose some members. It's so much better than seeing any member die an agonizing death.
